**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-15 and 17-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokomoro et al. (6,002,898; cited by applicant). The developing cartridge by Yokomoro et al. (Figures 34 and 35) teaches a cartridge frame; a developing roller; a one-end frame groove; a one-end bearing member for supporting a shaft a one-end bearing cylinder; a side covers (column 28, lines 21-62); and a first and second projection of metal (column 28, line 21- column 42, line 56).

***Response to Arguments***

3. Applicant's arguments filed 10-29-2004 have been fully considered but they are not persuasive. Applicant argues that Yokomoro et al. does not teach a one-end side cover projection engagable with a one-end side cover engaged with an inner surface of a one-end bearing member. However, Yokomoro et al. teaches a toner cover 64 having side portions (Figure 8), one-end bearing member 63F (Figure 34); and an end side seal 63A (Figure 33). Yokomoro teaches end members which are engaged together.

In addition, the claims recite members: one-end bearing member, one-end frame groove, and etc; however, these terms are not used in the specification. Please consider revising terminology. The claims remain rejected as discussed above.

Art Unit: 2852

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toba et al. and Kawai et al. teach pertinent prior art.
